

Lesson #3: Texture

OVERVIEW

Chen Yi uses a variety of textures throughout *Thinking of My Home* that effectively create dynamic interest and musical flow in the piece. Many classical Chinese composers aim for clarity in their music, avoiding a heavy musical texture. Chen Yi accomplishes this goal by keeping the texture delicate and subtle throughout.

LEARNING GOAL

Students will identify changing texture and call and response in the music by sight and sound, and experience the effect that these techniques can have on the music.

RESOURCES & MATERIALS

- Music Score to *Thinking of My Home*
- Recording of *Thinking of My Home*
- Recordings of music that contain monophonic, homophonic and polyphonic textures
- Copy of the [text of the piece *Thinking of My Home*](#)

PRIOR KNOWLEDGE

- Students have sung rounds and canons
- Students know that all vocal parts in brackets are sung at the same time

PROCESS

1. Discuss texture in music (monophonic, homophonic, and polyphonic). Have student identify each type of texture in other music they are rehearsing.
2. After rehearsing “Thinking of My Home” several times, ask students where in the music they sing the same words and pitches together. Review the term “monophonic.”

- Show how voice parts “line up” in unison (monophonic) singing like in m.8:

front of my bed, Mm

front of my bed, Mm

front of my bed, Mm

This musical score shows three voices (Soprano, Alto, and Tenor) singing in unison. The melody consists of a series of eighth notes, with triplets indicated by a '3' and a bracket. The lyrics 'front of my bed, Mm' are written below each staff. The measure number '8' is at the top left.

- Follow the same procedure for homophonic (each part sings different pitches at the same time) Sections like in mm.30-32:

think-ing of my home think-ing of my home.

think-ing of my home think-ing of my home.

think-ing of my home think-ing of my home.

This musical score shows three voices (Soprano, Alto, and Tenor) singing in homophonic style. The melody is the same for all three parts, but the pitches are different. The lyrics 'think-ing of my home think-ing of my home.' are written below each staff. The measure number '30' and a key signature change to F major (indicated by a box with 'F') are at the top left. The dynamic marking 'p' (piano) is present at the beginning of each staff.

3. Have students look at the score and identify where the voices seem to answer and/or imitate each other. Sing these sections. How does the use of imitation help portray the mood of the text like in m.11?

on ground

on ground on ground

on ground

This musical score shows three voices (Soprano, Alto, and Tenor) singing in imitative style. The Soprano part starts with the melody 'on ground'. The Alto and Tenor parts enter later, imitating the Soprano's melody. The lyrics 'on ground' are written below each staff. The measure number '11' is at the top left.

ASSESSMENT

Students will demonstrate their understanding of texture changes found in the music by identifying textures in the score as well as by sound.

EXTENSIONS

- . Explore texture in other choral works, through analysis or listening.
